- ▶ 2 x 9W UV lamps
- ▶ 1 x 9W white light for watermark recognition
- ▶ Single and bundled banknotes detection
- ▶ Dimensions (H\*W\*D): 202x162x171 mm
- ▶ Weight: 3.8 KG
- ▶ Power: 230 V

### most important features

- ▶ The UV safety feature is being used on almost all banknotes worldwide. These features are made visible by UV-lamps and will show (partly) hidden pictures.

Most of the time the whole banknote will lighten in case of counterfeit notes and not the only the parts that contain the 'UV-signature' like the genuine notes.

- ▶ **Warning:**  
In the meanwhile the counterfeiters are able to copy the UV safety feature in such a way, that (to check the notes) only an UV-lamp isn't sufficient anymore.

### technical specifications

- ▶ certificate CE
- ▶ guarantee 12 months (not on the lamps)

### checks following safety features

please check each individual product for the safety features that are checked
